

ALWIN SHYAM F

Full Stack Developer | React.js | Node.js | Firebase | MongoDB

alwinshyam21@gmail.com | +91 6380255310 | linkedin.com/in/alwin-shyam | github.com/Alwinshyam

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 10+ months of hands-on experience designing and delivering scalable, secure web applications. Proficient in React.js, Node.js, Express.js, MongoDB, Firebase, and Generative AI integration. Demonstrated expertise in RESTful API development, real-time WebSocket systems, JWT authentication, AI-powered features, and Agile/SCRUM methodologies. Passionate about clean architecture, OWASP-compliant secure coding, and building production-ready applications with exceptional user experience.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), Python, HTML5, CSS3, SQL
- Frontend:** React.js, React Hooks, React Router, Bootstrap, Responsive Design, State Management
- Backend:** Node.js, Express.js, REST API Design, WebSockets, JWT Authentication, Middleware
- Databases:** MongoDB, Firebase Realtime Database, Firestore, Firebase Storage, MySQL
- Cloud & Tools:** Firebase (Auth, Storage, Firestore), Basic AWS, Git, Postman, VS Code, IntelliJ IDEA
- Testing & Automation:** Playwright (JavaScript), Unit Testing, Debugging
- AI & Generative AI:** LLM Integration, Chatbot Development, Prompt Engineering, AI-powered Features
- Practices:** Agile/SCRUM, SDLC, Code Reviews, OWASP Security Guidelines, CI/CD
- Security:** JWT, OTP Authentication, Secure Coding Principles, Data Protection, Role-Based Access Control

PROFESSIONAL EXPERIENCE

- Software Engineer** | *Cogniot Technologies* Aug 2024 – Dec 2024
- Collaborated on end-to-end web application development with emphasis on secure coding and design thinking principles.
 - Implemented form validation, error handling, and debugging across React.js frontend components.
 - Designed normalized database schemas and implemented CRUD operations ensuring data consistency and reliability.
- Software Test Engineer - Trainee** | *Medverve Healthcare Pvt. Ltd.* Sep 2025 – Present (10 months)
- Developed and tested React.js-based healthcare web applications; gained hands-on experience in both frontend development and quality assurance with focus on code quality, test automation, and user experience validation.
 - Collaborated with cross-functional teams (QA, design, product) through full SDLC — requirements analysis, design, development, test design, test execution, debugging, and documentation.
 - Developed React.js components and backend features; implemented form validation, error handling, and responsive UI design while ensuring code quality and testability.
 - Performed comprehensive testing and debugging of frontend/backend issues; gained understanding of root cause analysis, issue resolution, and following quality assurance and secure coding best practices.
 - Participated in code reviews and testing cycles; built expertise in test case design, automation frameworks, API testing, secure testing principles, and OWASP security guidelines.
 - Created test documentation, quality reports, and technical documentation; learned best practices for test automation, integration testing, and production deployment.

KEY PROJECTS

- Freelance CRM System — Full-Stack SaaS Application**
React.js, Node.js, Express.js, MongoDB, JWT
- Architected and built a production-ready CRM web application for freelance client/lead/project management with role-based access control (admin/user).

- Developed RESTful Express.js backend with JWT authentication middleware, bcrypt password hashing, and MongoDB schemas for users, clients, leads, and tasks.
- Built React.js frontend with dashboard KPIs (total clients, leads, tasks, revenue), client management, lead pipeline (new → contacted → converted → lost), and task tracker.
- Implemented search/filter functionality, notes per client/lead, and responsive UI using React Hooks and React Router for full mobile/desktop compatibility.
- Structured project with clean separation of concerns (controllers, routes, models, middleware) for easy SaaS extensibility and future multi-tenancy support.

CQC Portal — Claim Quality Check System

React.js, Firebase, MongoDB, WebSockets, REST APIs, Generative AI

- Led full-stack development of a claim processing portal applying design thinking and OWASP-compliant secure coding throughout.
- Engineered real-time claim locking system using WebSockets to prevent concurrent access conflicts across distributed users.
- Implemented Firebase Authentication (OTP-based email login) and Firebase Storage for secure, scalable document management.
- Integrated Generative AI for intelligent claim summary generation, automated data extraction, and quality check recommendations.
- Developed document upload/retrieval and automated letter generation; authored end-user and technical documentation.

Pre-Authorization Management Application

React.js, Firebase, WebSockets, REST APIs

- Architected responsive React.js frontend for managing pre-authorization requests with real-time approval/rejection status updates.
- Integrated secure REST APIs for seamless data exchange; implemented Firebase Authentication for secure user login and session management.
- Developed WebSocket-based real-time notification system providing instant status alerts on authorization decisions.
- Applied responsive design patterns and UX best practices to optimize user engagement across desktop and mobile devices.

Trade2Cart — E-Commerce Marketplace Platform

React.js, Mock APIs, State Management, Generative AI Chatbot

- Designed and developed a multi-module e-commerce marketplace with component-based React.js architecture for scalability and maintainability.
- Implemented core features: product listing, city-based filtering, advanced search, category management, cart, and order management modules.
- Integrated AI-powered chatbot using Generative AI for customer support, product recommendations, and order assistance.
- Simulated backend operations using mock REST APIs demonstrating solid understanding of API integration, data flow, and state management patterns.

EDUCATION

B.E. — Computer Science and Engineering

National Engineering College, Kovilpatti | Aug 2021 – Apr 2024 | CGPA: 7.24 / 10

CORE COMPETENCIES

Full Stack Development • React.js • Node.js • Express.js • MongoDB • Firebase • REST API • WebSockets • JWT Authentication • Role-Based Access Control • Responsive Design • Agile • SCRUM • Git • CI/CD • Unit Testing • Playwright Automation • Generative AI Integration • Chatbot Development • Code Review • OWASP • State Management • Component Architecture • Database Design • Cloud Deployment
